Prevex® Flexloc™

**A durable and compact  
kitchen water trap.**

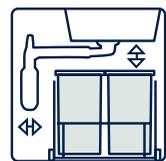

**PREVEX**  
ALL ABOUT WATER TRAPS

Prevex® Flexloc™

# Our most flexible water trap for kitchen sinks.

Flexloc was developed on our customers' request. With its versatility, this compact and robust water trap is a great solution for most needs. In fact, Flexloc is our most flexible water trap and a perfect fit for any kitchen sink. In addition, it is extremely quick to install.

### Compact

Flexloc has a low waste valve, saving space vertically. It can also be installed at the back wall, taking up only 76 mm of space. For very narrow spaces, the arms can be cut where needed.

### Flexible

Adjustable telescopic arms make sure that Flexloc fits kitchen sinks of any size. As one of the valves is higher than the other, it fits both high and low basins.

### One-fits-all

As this one-fits-all product covers most needs, there is no need to keep a lot of different products in stock. Hence, this flexible water trap saves warehouse space for our clients.

### Easy to install

Prevex water traps are pre-assembled, which means that they are very fast to install. This saves precious time for busy plumbers.

All our products meet the European EN-274 standard.  **Developed and produced in Finland.**

## Technical specifications

### MagneticCover-compatible

The strainers are compatible with the elegant Prevex MagneticCover.

### Flexible or rigid overflow

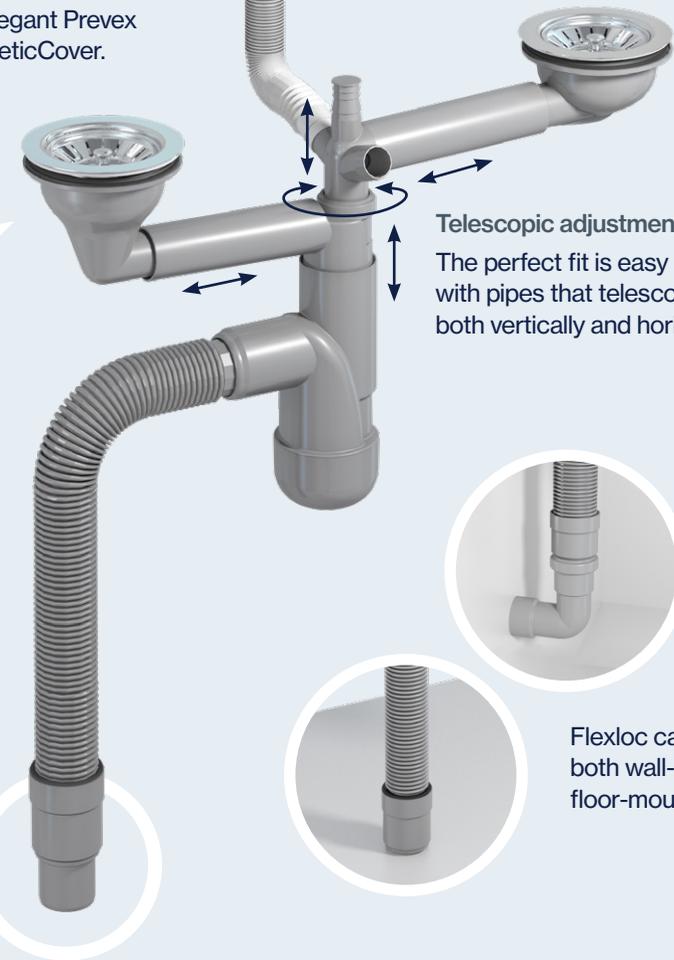

The flexible, white overflow is standard for P-loc and is easy to adjust to different kitchen sinks.

The smooth-surfaced pipe of the rigid overflow improves flow and prevents residue buildup.

### Remote

The waste kits can easily be replaced with remote-controlled waste kits.

### Telescopic adjustments

The perfect fit is easy to achieve with pipes that telescopically adjust both vertically and horizontally.

### Outlet pipe adapter

40/50-mm sewer pipe connection.

Flexloc can be both wall- and floor-mounted

### Light gold

### Gold

### Copper

### Gun metal

### Black matte

### Coloured accessories for trendy kitchens

Our kits include a strainer, a remote knob as well as an overflow cover in a uniform colour.
